

## Xin Zhang

Professor, University of Maryland Center for Environmental Science

Professor at the University of Maryland Center for Environmental Science and Director of the Global Nitrogen Innovation Center for Clean Energy and the Environment (NICCEE). She holds a Ph.D. in Environmental Science from Yale University and completed a postdoctoral fellowship at the Princeton School of Public and International Affairs.

Her research focuses on understanding how socioeconomic and biogeochemical processes influence the global nutrient cycle and the sustainability of agricultural production. She also advises on policy and technological innovations to mitigate nutrient pollution while meeting the global demand for food and biofuels.
