David Casini

Head of Agro-Bio-Clima Business Unit in RE-CORD

Dr. Casini is an Environmental Engineer and currently serves as the Head of the Agro-Bio-Clima Business Unit and Research Scientist at RE-CORD. In his role, he focuses on research, development, and innovation projects, with a primary emphasis on circular economy principles and environmental sustainability. His key areas of expertise include the tailored production of biochar for diverse applications (ranging from industrial to agronomic purposes), the development of microalgae production plants, anaerobic digestion, and contributing to soil health initiatives. Mr. Casini also possesses significant experience as a project manager, having successfully overseen several EU-funded projects. He holds a BSc in Environmental Engineering and a Master in Bioenergy and Environment (IMES) from the University of Florence.
